under its especial protection, this advice ought to be worthy of some attention. But before taking it implicitly it will be proper to inquire whether the sheet which gives it, is fully posted. And to throw some light on | ceedingly slim the question, we collect one or two of the eigns of the Times.

On the 13th of Nov., mst., John Cochrane, a leading democratic politician of New York, in an address to his regiment at Wash-

ington, raid

Suppose the enemy advances against you, would you from any squeamishness, from any false deli-cacy, refrain from levelling the hostile gun and prostrating them in death? No. It is your object. It is your purpose. Then if you reize their property, if you open their peris, if you destroy their lives, I ask you whether you will not seize their slaves? I ask you whether you will not arm their slaves, and whether you will not carry them by battalions into war against their massers " & What ! You have no sympothy for white ebels, and yet you will spare the black slave whom they use? Why, if it be necessary to save this Government, I would plunge their whole people, black and white, into one indiscriminate sea of carnage and slaughter, and build upon it a government which shall be the vicegerent of God. Let us have no more of this dailying with dilletante conservation, this doubling in Collinet when your soldiers are perishing in the field. Soldiers, you know no such reasoning as this. You have arms in your hands, and those arms are for exterminating the enemy until he submits to law. order and the Constitution.

Then explode whatever combustible is in your way; set fire to and con-nume the cotton; export the cotton; take property whonever you find it, confis-cate property wherever you find it; take the slave and bestow him upon the non-slaveholder if you please-do unto them as they would do unto you : raise up in their mid t sparty inter at against the present slaveholder: we all this, and if that be not sufficient, take the clave by the hand, place a musket in it, and all him in God's name, strike for the liberty of the

So the Theofora left Nassau and stramed away towards Caba. On the 16th inst., she arrived at Cardenas, where the commissioners landed. The news that a southern steamer had arrived with Messrs, Mason and Slidell on board, which was egraphed from Cardenas to Havana, was scarce credited at the latter place. But when, on the 7th inst., the Theodora came up the barbor of Havana, displaying the Contederate flag, the quays were immediately thronged with thousand of wondering spectators, and a most cordial and enthusiastic reception was given to the adventu rous litt e craft. The Yankees in Havana were as a matter of course, much disgusted at the well come given to the Theodora.
